Outlandish Scotland Journey

UK Internet Access

Begin Your Pre-Trip Research by Reading the Following Internet Resources

(We've included a few highlights from each, to pique your interest.)

Then, peruse the Internet Access pointers offered by *A Novel Holiday* authors and contributors.

Rick Steves' Internet Access Tips

Internet Security for Travelers

<https://www.ricksteves.com/travel-tips/phones-tech/internet-security-for-travelers>

These tips are important to Outlanderites traveling *anywhere*—we suggest you read the entire article.

Safety Tips for Traveling with Your Own Device

“If you're taking your devices on the road, be aware that gadget theft is an issue in Europe [as well as UK destinations]. Not only should you take precautions to protect your devices from thieves, but you should also configure them for maximum security so that if they are stolen, your personal data will stay private. ...

“At the very least, make sure your device is password- or passcode-protected so thieves can't access your information if it's stolen. If it's already protected, consider decreasing the time it takes for the screen to lock when not in use—while it's annoying to have to keep entering your code, that's not nearly as annoying as identity theft (and you can relax your security settings once you're home). For an extra layer of security, consider setting passwords on [phone] apps that access key info (such as email or Facebook). ...

“Once on the road, use only legitimate WiFi hotspots. Ask the hotel or café for the specific name of their network, and make sure you log on to that exact one. **Hackers sometimes create bogus hotspots with a similar or vague name (such as 'Hotel Europa Free WiFi') that shows up alongside a bunch of authentic networks.** It's better if a network uses a password (especially a hard-to-guess one) rather than being open to the world. If you're not actively using a hotspot, turn off WiFi so that your device is not visible to others. ...”

Safety Tips for Using Public Computers

“It's perfectly safe to use a public computer for tasks that don't require you to log in to an account. For instance, checking train schedules, maps, or museum hours doesn't pose a security risk. The danger lies in accessing personal accounts that require you to enter a login and password (such as email, Facebook, or any ecommerce site). ...

“Public computers may be loaded with damaging malware, such as key-logger programs that keep track of what you're typing—including passwords. ...”

Accessing Personal Information Online

“While you're away, you may be tempted to check your online banking or credit-card statements, or to take care of other personal-finance chores. Internet security experts advise against accessing these sites entirely while traveling. ...

“Savvy password habits are also critical. Above all, don’t use individual dictionary words, don’t reuse passwords (or even similar passwords) across different sites (a password-manager program really helps), and think in terms of using a “passphrase” — the longer your password, the better. ...”

<https://en.wikipedia.org/wiki/Passphrase>

Internet Calling and Messaging

<https://www.ricksteves.com/travel-tips/phones-tech/calling-over-internet>

Rick offers terrifically helpful tips about Internet calling/messaging apps that allow you to inexpensively connect with family and friends back home.

“A cheap way to stay in touch while traveling is to use Internet calling/messaging apps, such as Skype, Apple’s FaceTime and iMessage, or Google+ Hangouts, to make free calls online or message to your heart’s content. Many travelers use a mix of these apps, based on what their friends and family are already using at home. ...”

Reid Bramblett’s Internet Access Tips

Jacking In: Getting On-line on the Road—Cybercafes and Internet access while Traveling.

http://www.reidsguides.com/t_cm/cybercafes.html

“Postcards can take up to a week [to reach their recipient]. Tweeting, posting updates, blogging, or simply sending your jealous friends a quick email rundown of what a fantastic vacation you’re having is [received almost instantaneously]. (Plus, it’s a great way to create installments of a trip journal for your own uses.) ...”

There are four major types of places where you can get online:

Cybercafes—A little room, disused office space, rented storefront, corner table in a pub or café, pretty much anywhere an enterprising entrepreneur can plug in a bunch of computers and hook them up to his DSL connection. That’s a Cybercafe. Access fees can range anywhere from 10¢ per minute to \$10 an hour or more. ...

Your Hotel—Increasingly, hotels have a PC jacked in and available for guest use. Sometimes it’s free; sometimes it costs a bit (rarely more than a regular Internet café, though). It’s always convenient. ...

Public Kiosks—These suck. They’re basically like payphones, only with a big screen and a keyboard attached. ...

Libraries—The big traveler’s secret that no Internet café wants you to know about. Public libraries the world over offer access, for free, and usually to anyone who wanders in (you don’t have to have a local library card). Of course, they put you on a time limit, and remember: no loud typing!

Extra Outlandish Tips

From *A Novel Holiday* Authors & Contributors

The Cheapest and Most Convenient UK Internet Access Option:

Lodging at Places that Offer Free WiFi

These days, almost all UK lodgings that have a Website offer free WiFi Internet access to their lodgers—even small, Mom-&-Pop-run B&Bs. When investigating UK lodgings, pay particular attention to whether or not they offer *free* WiFi. If it doesn't say "free," they charge for it—keep searching.

Oddly enough, it is some of the most expensive UK hotels that still charge a fee for WiFi access. The Heathrow Hilton Hotel, for example, offers free WiFi only to "Hilton Honors Gold and Diamond Members." All others are charged £13 (\$19) per day.

Happily, the Balmoral Hotel in Edinburgh (*Outlandish Scotland Journey Part Five*) now offers "complementary WiFi for up to 5 devices" in each room—even when staying in their cheapest room.

After checking in and obtaining your **WiFi log-in code**, follow Rick Steves' advice for avoiding *bogus* (hacker) WiFi hotspots:

"Ask the hotel [or B&B host] for the **specific name** of their network, and make sure you log on to **that exact one.**"

Impenetrable Places

Many buildings in the UK are constructed with very thick stone or brick walls, especially the oldest and most Outlandishly-interesting accommodations. Unfortunately, thick walls tend to block cell phone and WiFi signals, both from without and *within* a building.

When lodging in a marvelously old and historic building, don't be surprised if you have trouble getting a WiFi signal while in your room. (If you're paying for WiFi, but can't get a signal in your room, politely ask for a refund.)

Happily, these days many thick-walled, historic lodgings—including small, Mom-&-Pop-run B&Bs—have installed a "booster" that amplifies their WiFi router's signal. Thus, you may not encounter any difficulty.

Reception problems caused by impenetrable architecture can sometimes be overcome simply by opening a window—particularly for cell phone or mobile broadband signal access. To obtain a reliable WiFi signal, however, you may have to use your tablet or laptop in the building's common area, which usually is nearer to the host's WiFi router. Although this situation limits your online privacy, focus instead on the opportunity to meet new people that is afforded by frequenting the common area.

The Only **SECURE** UK Internet Access Option: A Personal Hot Spot

DC Carson suggests:

“If it is **imperative** that you login to sensitive sites that require **secure** access while traveling (banking accounts or the like, for example), using your smart phone’s personal **HotSpot app**, or purchasing a UK-enabled personal **HotSpot** may be worth your money. Keep in mind, however, that **HotSpots Use Data**. Arrange for an ample International Data Plan if you’ll be using a personal HotSpot frequently.”

When you call your home phone service provider to discuss UK Phone Options, ask the rep about personal HotSpots.

<http://OutlandishScotland.com/UKphones.pdf>

Free Public WiFi Hot Spots

It is not just coffee shops anymore! More and more UK restaurants, grocery stores, and other businesses have started offering free WiFi access in order to increase customer interest. When visiting major cities such as Edinburgh and Inverness, you’ll have no problem finding a free WiFi hotspot.

Please Note, however, that Free Public WiFi Hot Spots are rarely **SECURE**! Do *not* use them to access sites that require you to login with personal information!

According to Reid Bramlett:

“Internet cafés pop up and disappear with astonishing frequency, so even the resources for tracking them down such as ~~Cyberactive.com~~, Cybercafes.com [<http://www.cybercafes.com/>], or www.world66.com/netcafeguide **will not be totally up-to-date**.

“You can [usually find free WiFi hotspots] clustered around train stations, neighborhoods packed with tourist hotels, backpacker hangouts, and often just off major squares. When in doubt, just ask around (your hotel, the tourist office, fellow travelers).”

http://www.reidsguides.com/t_cm/cybercafes.html

A UK Internet Free WiFi finder we’ve occasionally used is the **Wi-Fi-FreeSpot Directory**:

<http://www.wififreespot.com/europe.php>

Scroll down to England, Wales or Scotland, as needed.

Alternatively, use the store locators for UK businesses *known* to offer free WiFi access—inserting the name of the city you’ll be visiting each day, or the postal code of your lodgings each evening. When using the locator links below, be sure to check the **WiFi** option before clicking on the search button.

UK McDonalds Free WiFi

<https://www.mcdonalds.com/gb/en-gb/restaurant-locator.html>

Located all over the UK, most McDonalds restaurants now offer free WiFi. Although you may have to register during your first visit (at no charge), once you’ve done that you can access the Internet as long as you want for the price of a single cup of coffee, an order of fries—whatever.

UK Starbucks Free WiFi

<https://www.starbucks.co.uk/store-locator>

All you'll have to pay to access the Internet at a UK Starbucks is the cost of a cuppa or a snack, in order to justify your presence in the store.

"Now all our customers can get online for free at hundreds of hotspots at Starbucks throughout the UK. You no longer need a registered Starbucks Card to log on—just click 'Connect' and enjoy one-click, high speed WiFi access on us. ... Each WiFi session lasts for 2 hours but you can have an unlimited number of sessions every day—just reconnect after 2 hours."

UK Welcome Break Motorway Service Stations Free WiFi

<https://www.welcomebreak.co.uk/facilities/free-wifi/>

<https://www.welcomebreak.co.uk/locations/>

When driving through the UK, you'll find free WiFi Internet access at any of the Welcome Break locations found along major Motorways. (Welcome Breaks are highway rest stops that put the majority of US & Canadian "Rest Stops" to shame!) You don't have to purchase anything to use a Welcome Break's restrooms *or* their free WiFi.

Free WiFi at UK ASDA Stores

<https://www.asda.com/wifi-connected>

You may need to register for this free service at the store. Once registered, you will be able to access Asda WiFi automatically in any of the UK ASDAs.

If you'll be driving to an ASDA store immediately after picking up your UK rental car (as we suggest), consider registering while you're there.

Use the link below to find an ASDA in each of the cities you'll be visiting, or the ASDA nearest to each of your evening's lodgings.

<https://storelocator.asda.com/#/>

Free WiFi at UK Tesco Stores

<http://home.bt.com/news/bt-life/bt-WiFi-available-in-tesco-stores-11363944815149>

"Tesco customers can now access the Internet while they shop, thanks to a new partnership between the supermarket and BT WiFi. To enjoy the new service, shoppers can select 'Tesco WiFi' or 'BT*' on their smartphones or tablets. It's available at 806 Tesco Extra and Superstores in the UK and 113 stores in the Republic of Ireland."

[It is unclear whether you must "register" in order to access Tesco's WiFi. If you *do* have to register, we anticipate that the registration will be free.]

Use the link below to find a free-WiFi-offering Tesco Extra / Superstore in each of the cities you'll be visiting, or the Tesco Extra / Superstore nearest to each of your evening's lodgings.

<https://www.tesco.com/store-locator/uk/>

If you'll be driving to a Tesco Extra / Superstore immediately after picking up your UK rental car, consider registering while you're there.

Keeping a Travel Journal vs Travel Blogging

These days, Travel Journal *books*—pen-on-paper affairs—have become a thing of the past.

If you'll be Outlandering in the UK with a laptop, you can digitally record a daily "Travel Journal" account of your adventures on that, as well as saving all your photos to it each day (freeing up your camera's memory card).

To share your travel experiences with friends and family while on holiday, however, consider creating a private **Online Travel Blog** dedicated to your Outlandish Scotland Journey.

FACEBOOK or TWITTER as an Online Outlandish Travel Journal

Outlanderites who already have a Facebook or Twitter account can use these social media platforms to document and share each day's adventures—absolutely free. Unfortunately, posting pretty pix and travel experiences on Twitter, or a *public* Facebook account, while on holiday **notifies thieves that you are NOT HOME!**

"Social networking sites like Facebook and Twitter can be a risk if people know you are away and your home is empty," police officers have warned residents.

"Just because you are on holiday, does not mean burglars are taking time off too, and if it looks like you are away, then your home could become a target."

<https://www.express.co.uk/life-style/science-technology/625716/Facebook-Warning-Social-Media-Never-Share-Christmas-Danger>

There also is a possibility that posting holiday photos on Twitter or a public Facebook account may constitute a breach of your home insurance policy's "reasonable care" clause, thus *voiding your coverage* should your home be robbed while you are away! To learn more about this—and what precautions to take—read the following article:

<https://www.thatsnonsense.com/warning-about-posting-photos-of-holiday-invalidates-home-insurance-fact-check/>

Solution #1 (Easiest): Sign up for a **new Email address** (with Gmail, or Yahoo, or the like), and use that Email to create a new—**Private**—Facebook account to use during your Outlandish Scotland Journey. Share that Facebook address *only* with family and friends.

Solution #2 (Almost as easy): Write your daily Outlandish Scotland Journey report in an Email, inserting a very few photos, and group-send it to family and friends.

Solution #3 (More Complicated, but More Entertaining for All): Create an online Travel Blog.

Beware of searching "easy personal blogs," or the like. Most of the links generated by such terms are *advertisements*—even the ones titled something similar to, "**The Top Free Blog Platforms for 2019.**" The so called "article" you'll reach is often an advertisement for the "top-ranked" service.

We like WORDPRESS for Creating an Online Travel Blog

Wordpress offers a Free Blogsite setup that is relatively easy to accomplish and use.

<https://wordpress.com/free>

- Free WordPress.com subdomain. [You don't need to pay for a Domain Name.]
- Powerful website hosting.
- Dozens of free themes.

We have no experience with the following options, but they sound promising.

<https://www.blogger.com>

Give your blog the perfect home. Get a free blogspot.com domain or buy a custom domain with just a few clicks.

<https://www.freemake.com/blog/top-5-free-websites-to-keep-diary-online/>

However You Decide to Set Up an Online Travel Journal / Blog
for Friends & Family to Enjoy:

Be sure to setup your new (private) **Outlandish Scotland Journey Facebook page**—or your new **Online Outlandish Scotland Journey Blogsite**—*before leaving home*. That way, you can share its address in the Itinerary you provide to family and friends, and it will be ready to use the moment you leave home.

Happy Outlandering!!!
